LOGARAKSHIKA A

logarakshikaa@gmail.com | 9363076278 | logarakshikaa | logarakshika

PROFILE

Computer Science and Business Systems student with a 9.32/10 CGPA and hands-on experience across software development, Python automation, SQL, AI/ML, and data-driven applications. Experienced in developing practical solutions through internships and academic projects using Python, Java, SQL, JavaScript, Streamlit, Scikit-learn, SQLite, and Git/GitHub. Interested in Business Analysis, Data Analytics, Product Analytics, and technology-driven problem-solving. Currently serving as Entrepreneurship Development Cell Coordinator for the CSBS department, with experience in team coordination and event management.

WORK EXPERIENCE

SkillCraft Technology

Web Development Intern

2025

- Developed responsive web pages using HTML, CSS, and JavaScript, focusing on usability and responsive design.
- Implemented front-end enhancements and UI components for web-based applications.
- Used Git and GitHub for version control and maintained an organized development workflow.

CodeAlpha

Backend Development Intern

2025

- Developed RESTful APIs and backend functionality for web applications.
- Implemented server-side logic and data-handling workflows to support application functionality.
- Applied structured development practices to build maintainable and scalable backend components.

Oasis Infobyte

Java Developer Intern

2025

- Developed Java applications using object-oriented programming, exception handling, and core programming concepts.
- Implemented application logic and programming solutions for practical use cases.
- Strengthened problem-solving and software development skills through hands-on development tasks.

EDUCATION

S.A. Engineering College, Chennai

Bachelor of Technology - Computer Science and Business Systems (CSBS)
2024 - Present | CGPA: 9.32/10 (through 4th semester)

PROJECTS

AI-Based Personalized Study Plan Generator

Python | Streamlit | Scikit-learn | SQLite

- Developed an AI-powered application that generates personalized study schedules based on student performance and study availability.
- Implemented ML-based subject prioritization, SQLite database integration, PDF report generation, and automated email delivery.
- Designed data preprocessing and recommendation workflows to support personalized academic planning.

Anomaly Guardian
Python | AI/ML | Data Analysis | Real-Time Monitoring

- Designed an anomaly detection framework for identifying irregular patterns in streaming and operational data.
- Integrated data visualization, event-driven alerts, and backend processing for real-time monitoring.
- Applied anomaly detection concepts to operational analytics and real-time decision support.

Thiralvizhi – Smart Bus Flow Optimisation System
Data-Driven Systems | Intelligent Transportation | Urban Computing

- Designed a data-driven transportation workflow focused on bus flow coordination and public transit efficiency.
- Explored workflows for transport monitoring, route optimization, and intelligent traffic management.
- Applied computational optimization concepts to urban mobility and operational decision-making.

LEADERSHIP / POSITIONS OF RESPONSIBILITY

Entrepreneurship Development Cell Coordinator
Department of Computer Science and Business Systems, S.A. Engineering College
2026 – Present

- Coordinate Entrepreneurship Development Cell activities and initiatives for the CSBS department.
- Support the planning and execution of entrepreneurship, innovation, and startup-focused events.
- Collaborate with faculty members and student teams to coordinate departmental activities and student participation.

Event Coordinator - Think Verse (Paper Presentation), ZENITH'26 Symposium
Department of Computer Science and Business Systems, S.A. Engineering College
2026 – Present

- Coordinated the Paper Presentation event for the department's 3rd-year symposium, supporting participant coordination and event execution.
- Worked collaboratively with student coordinators and faculty members to manage event activities, timelines, and participant requirements.
- Developed practical skills in teamwork, time management, communication, problem-solving, and event coordination.

TECHNICAL SKILLS

- Programming: Python, Java, C, JavaScript
- Data & Databases: SQL, SQLite
- AI & Machine Learning: Scikit-learn, TensorFlow, Keras, OpenCV
- Web Development: HTML, CSS, JavaScript
- Tools & Platforms: Git, GitHub, Streamlit, Jupyter Notebook, Google Colab, VS Code
- Other: Flutter

ACHIEVEMENTS

- 2nd Prize - Eureka, organised by ED-Cell, S.A. Engineering College
- Special Mention & ₹10,000 Prize - TNWISE Hackathon, TANCAM
- State-Level Participant – NimirNthu Nil Hackathon, EDII- Tamil Nadu
